The Safety Net For Your Portfolio

On Target

- QID’s market predictive model is on track
- We expect the market to add another 5-6% performance by year-end with a month-end high level around 3185.
- However, we do see clouds towards year-end for a 5-6% pull-back into 1q2020 back to S&P 500 levels of 2950.
- Long-run we remain positive with a five-year S&P 500 estimate of 6000.

Exhibit1. S&P 500 Estimator Model

Source: Morningstar Direct and QIDLLC

Market continues to track our Estimator Model. The red portion of the above chart is the expected path of the market through year-end. Currently, we are expecting the S&P 500 to reach a month-end high of 3185 by the fourth quarter. At this point the model is suggesting we could run into a little rough patch potentially decreasing 5-6% by first quarter of 2020. Long-term, the model remains positive with a five-year estimate of 6000 on the S&P 500, a double from current levels. What could cause the market

weakness towards year-end? Trade talks will be a major factor between now and year-end to complete. It most likely will be the reason that we rally another 5-6% into the fourth quarter as the negotiators define terms and conditions of the agreement and earnings visibility becomes more positive for 2020. Improved earnings and GDP outlook could be the catalysts that renew concerns about rising interest rates that triggers the slight correction.

Disclosures

Quantitative Investment Decisions, LLC ("QID") claims compliance with the Global Investment Performance Standards (GIPS®).

Firm Definition

Quantitative Investment Decisions, LLC ("QID" or the "Advisor") is registered investment advisor in the state of Florida organized as a Limited Liability Company ("LLC") under the laws of the State of Delaware, whose principle place of business is in Naples, FL. The entire investment team and critical operations staff became affiliated with QID on January 2, 2015.

QID reviews a total firm AUM report broken out by account on a quarterly basis to ensure that only actual assets managed, or sub-advised, by QID are included. All accounts deemed to be advisory only, hypothetical, or model in nature are excluded from total firm AUM. Total firm assets are all discretionary (whether fee-paying or not) for which QID has investment management responsibility, including assets managed by sub-advisors that QID has authority to select.

Obtaining a Compliant Presentation and the Firm's List of Composite Descriptions

A compliant presentation, including the performance data for the composite, may be obtained by contacting QID at 239.631.8912 or by emailing info@qidllc.com.

The Quantitative Investment Decisions' (QID) Tactical U.S. Equity Strategy, Tactical International Equity Strategy, Tactical U.S. Fixed Income Strategy, and the Tactical Alternative Investments Strategy are long-term growth portfolios that invests in Exchange Traded Funds (ETF) as markets are rising and scales to cash as markets weaken using a trading algorithm. Their objective is capital appreciation. The portfolios represent United States markets, international markets, United States fixed-income markets and a blend of commodities and REITs that constitute the alternative investments strategy. The charts above show the total return, including reinvestment of all dividends. Returns are shown net (NR) of management fees and transaction fees for the composite account of the portfolios. The U.S. dollar is the currency used to express performance. QID claims compliance with the Global Investment Performance Standards (GIPS®). QID has been independently verified and its composites receive a quarterly performance examination by Ashland Partners & Company, LLP. **From April 30, 2012 through December 31, 2015 the performance shown is that of a composite of client accounts according to the dictates of the Program.** The quantitative engine providing strategy signals was enhanced effective April 1, 2014. The portfolio weighting scheme was also enhanced effective September 1, 2014.

Benchmarks are used for comparison purposes to correlate to each portfolio. The returns for the indexes shown include dividend reinvestment. Individual client accounts may have experienced investment results during the corresponding time periods that were materially different from those of the composite returns. **Performance data shown is past performance. Past performance is no guarantee of future results. Investments are subject to risk, and any of QID's investment strategies may lose money. QID's actively managed portfolios may underperform in bull or bear markets. The investment strategy presented is not appropriate for every investor and individual clients should review the terms, conditions and risk involved with specific products or services. The portfolio is constructed with Exchange Traded Funds that seek investment results that, before expenses, generally correspond to the price and yield of a particular index. There is no guarantee that the price and yield performance of the index can be fully matched. ETFs are subject to risks similar to those of stocks.**

Risks

No investment strategy or risk management technique can guarantee returns or eliminate risk in any market environment. Asset allocation, nor diversification, does not guarantee a profit or protect against loss. Investment returns may fluctuate and are subject to market volatility, so that an investor's shares, when redeemed or sold, may be worth more or less than their original cost. **All investments include a risk of loss that clients should be prepared to endure. Quantitative Investment Decision's actively managed portfolio may underperform in bull or bear markets.**
