Quantitative Investment Decisions Awarded Top Guns Designation by Informa Financial Intelligence

Naples, FL —August 19, 2019— Quantitative Investment Decisions, LLC (QIDLLC) has been awarded PSN Top Gun distinction by Informa Financial Intelligence’s PSN manager database, North America’s longest running database of investment managers.

QIDLLC was honored with the following Top Gun rating:

- QID Fixed Income – 1 Star Intermediate Maturity Universe

“We are very pleased to receive another award from Informa, said Ron Santangelo CIO and Senior Manager. This gives us over 30 Top Gun Awards in less than four years. We believe these awards are a recognition of our firms’ successful quantitative models. The goal is to reduce the impact of emotion to our investment process by providing investors a reasonable upside returns while reducing extreme downside risk. Our quantitative investment models determine when a sector is “On/Off or Own/Don’t Own. Each strategy we manage starts to raise cash when the models determine there is substantial downside risk. The strategies can go to 100% defensive cash/treasury position.”

Through a combination of Informa Financial Intelligence’s proprietary performance screens, [*PSN Top Guns](#) (*free registration to view Top Guns) ranks products in six proprietary categories in over 50 universes. This is a well-respected quarterly ranking, and is widely used by institutional asset managers and investors. Informa Financial Intelligence is part of Informa plc, a leading provider of critical decision-making solutions and custom services to financial institutions.

Top Gun firms are awarded a rating ranging from one to six stars, with the number of stars representing continued performance over time.

QID’s strategies received 1-Star Top Gun rating meaning:

[1-Star Category:] had one of the top five returns for the quarter in their respective universe.

QIDLLC’s Fixed-Income strategy invest across corporate bonds, mortgages, muni’s and intermediate treasuries. The sector’s that are on are equally weighted in the portfolio. If more than two sectors are off, the strategy starts to invest in cash-like instruments as a defensive position.

“Congratulations to Quantitative Investment Decisions for being recognized as a PSN Top Gun,” said [Ryan Nauman](#), **Market Strategist at Informa Financial Intelligence’s Zephyr**. “This highly
